

V80 VERTICAL SHAFT IMPACTOR

The McCloskey V80 (VSI) has been designed to be one of the most efficient vertical shaft impactors on the market for producing high specification sealing aggregates, a high proportion of fines required for main roads/ road-base, or manufactured sand. This heavy duty track-mounted Vertical Shaft Impactor has been designed with a host of user friendly features and several rotor/rockbox/ anvil options that are suited to all applications.

Built to the industry leading standard of all McCloskey equipment, the V80 uses high-quality branded components like a CAT C13 430 hp power unit and a Cemco Turbo T-80 VSI crusher.

Adjustable Feed Hopper
Control panel, remote, or fully automatic regulation allows optimal operation of the crusher to better control the product material

Hopper
Heavy duty with a Hardox® steel hopper. Feed rate controlled via control panel, remote control or fully automatic regulation via feedback from the VSI.

Metal Detector
The metal detector, combined with the hopper, helps protect the VSI. When metal is detected, the feeder stops automatically.

Crusher
Vertical Shaft Impactor shatters rocks along natural stress lines, creating a uniform, cubical product with low wear costs and simple maintenance.

Durability
Branded components throughout, including CAT engine. High efficiency diesel hydraulic system allows higher throughput and lower fuel consumption.

V80

Engine: CAT C13 – 430 hp
Transport Height: 3.4m (11' – 2")
Transport Length: 16.02m (52' – 7")
Transport Width: 2.9m (9' – 6")
Stockpile Height: 3.25m (10' – 8")
