

# TF80 HIGH EFFICIENCY FEEDER STACKER

The TF80 Mobile Tracked Feeder Stacker is enhancing the process of stockpiling materials that traditionally can cause blockages in conventional stackers. The TF80 facilitates the handling and stockpiling of large wood waste, bark, compost and topsoil, all of which can be fed into the hopper with large loaders and excavators.

In addition to the mobility enhanced by tracks, a large feeder hopper, wide heavy duty 80' long conveyor, and a heavy duty feeder make the TF80 a robust, mobile stockpiling conveyor for use across a number of industries.

### Hopper

Up To 23.0 Cubic Yard (17.0m<sup>3</sup>) Hopper. Includes a 48" Chevron feed belt to evenly convey material such as wood chips and logs without bridging.

### 48" Chevron Main Conveyor

Allows stockpiling of high volume materials without spillage or bottlenecks.

### Open Access Engine Bay

Provides class leading access to hydraulic valves and the transverse mounted 129hp Tier III Diesel engine.

### Track or Wheel Mobility

Fully portable stockpiling solutions available as wheel mounted trailer unit or a track unit for maximum on-site mobility.

### Durability

Branded components throughout, including CAT Engine. High efficiency diesel hydraulic system allows higher throughput and lower fuel consumption. Vulcanized belts with high quality scrapers.

TF80 Spec

Engine: CAT 4.4 – 100HP  
Transport Height: 3.5m (11' – 7")  
Transport Length: 19.46m (63' - 10")  
Transport Width: 2.9m (9' – 7")  
Stockpile Height: @ 29 degrees 12.6m (41' - 7")
